Event Report

Academic Year: 2026-27 **Semester-I/II**

Name of the event: ROBO Race Competition (Line Follower Robot)

Date and Time	10th April 2026 ,
Event Venue	1st Floor, ADYPSOE
Organized by	Mechanical Engg. Department
Targeted Audience	SE, TE,BE Students
Resource Person	Coordinators: • Sagar Gutal • Avishkar Durgude Judges: • Amruta More • Jayshree Suryawanshi

Event Contents:-

1. Robot Assembly using provided components
2. Circuit design and wiring of the robot
3. Programming for autonomous line following
4. Robot race on a predefined track

Details of the event:-

The ROBO Race Competition was conducted on 10th April 2026 as part of the technical event TORQUE 2K26. The event focused on designing, assembling, and programming a line follower robot capable of navigating a predefined track autonomously.

The competition consisted of two main rounds: the Assembly Round and the Line Follower Race Round. In the assembly round, participants were provided with all necessary components and

were required to construct the robot within the given constraints. Proper wiring, structural stability, and adherence to safety guidelines were emphasized.

In the race round, the robots were tested on a track consisting of curves, turns, and zig-zag paths. Each team was given two attempts, and the best time was considered for evaluation. The robot had to follow the track autonomously without any manual intervention.

The judging criteria included assembly and design, circuit connections, programming logic, track completion time, and teamwork. Participants demonstrated strong technical skills, coordination, and problem-solving abilities during the event.

The event successfully provided hands-on experience in robotics, embedded systems, and automation. It also encouraged teamwork and practical implementation of theoretical concepts.
